

CARBOXY THERAPY

The mask works on the skin based on the principles of carboxytherapy. The combination of two natural salts (sodium bicarbonate and sodium monocitrate) reacts with water and the surface of the skin to form a rich foam.

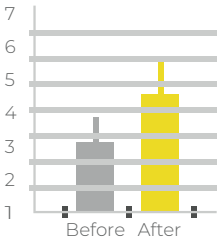

When released, it gently and effectively penetrates the tissue, providing the Bohr effect. That is, the epidermis responds to the effects of carboxy therapy as a stress factor and after temporary hypoxia caused by CO₂ molecules, cellular respiration is significantly activated, in response increasing blood circulation and collagen production.

USEFUL PROPERTIES

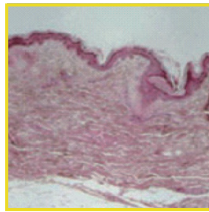

- Hemoglobin absorbs the CO₂ caused by the combination of the sodium bicarbonate and sodium monocitrate powder while simultaneously releasing oxygen.
- A high quantity of oxygen is supplied to the skin while brightening and enhancing the elasticity of dull skin by improving the blood circulation.

ELASTICITY

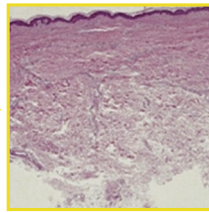

BEFORE

Irregular dermis layer

AFTER

Thicker dermis and rearranged collagen

After treatment of CO₂, skin elasticity is improved as dermis thickens irregular dermis

When carboxy therapy is absorbed by skin cells, hemoglobin in red blood cells release oxygen.

This process provides oxygen to the skin while simultaneously stimulating the blood circulation, metabolism, collagen synthesis.

These reactions reduces marks, acne and inflammation while enhancing skin tone, elasticity and oil/moisture balance.

NON-INVASIVE CARBOXY THERAPY

BRIGHTENING, SKIN ELASTICITY, HYDRATION, ANTI AGING

ENJOY YOUR
BEAUTY ROUTINE

INDICATIONS:

- Age-related skin changes
- Deep and superficial wrinkles
- Skin hyperpigmentation
- Acne and post-acne
- Asthenic and dry skin
- Slow skin regeneration
- Pigmentation

RESULT:

- Increases instantaneous oxygen availability in the skin
- Returns freshness, radiance and vitality to the skin
- Increases cellular energy levels necessary for proper metabolic processes
- Improves skin structure, has anti-aging and regenerating effects

STEP 1 WELCOME	<ul style="list-style-type: none">■ Welcome your client.■ Explain the treatment, conduct a consultation, perform a preliminary skin diagnosis, and ensure their comfort on the treatment bed.	
STEP 2 SKIN PREPARATION	<ul style="list-style-type: none">■ Remove makeup from the eye and lip area using Micellar Peach Water.■ Cleanse the face and neck with Silky Cleansing Milk.■ Wipe the skin with Toning Lotion. <p>PRODUCT: CARELIKA Micellar Peach Water (5ml) CARELIKA Silky Cleansing Milk (5ml) CARELIKA Toning Lotion (2ml)</p>	
STEP 3 CARBOXY THERAPY FIZZING MASK	<ul style="list-style-type: none">■ Mix 20 g of powder with 15 ml of water in a bowl. Mix the mask thoroughly.■ Apply with a brush on the face and neck.■ After 15 minutes, remove the mask with a spatula, then rinse off any residue with water.■ Wipe the skin with cotton pads soaked in toner. <p>PRODUCT: CARELIKA Carboxy Therapy Fizzing Mask (20mg)</p>	
STEP 4 MOISTURIZING MASK	<ul style="list-style-type: none">■ Apply the Mask for 15 minutes. You can massage over the mask, then rinse with warm water and tone the skin. <p>PRODUCT: CARELIKA Hydra Infusion Mask (10ml)</p>	
STEP 5 COMPLETING THE PROCEDURE	<ul style="list-style-type: none">■ Apply the Cream to the face and décolleté area. <p>PRODUCT: CARELIKA Active Moisturizing Cream (1-2ml)</p>	

<p>STEP 6 SKIN PROTECTION</p>	<ul style="list-style-type: none"> ■ Complete the procedure with an Oxyglow Hydration Spray enriched with an oxygenating and moisturizing complex. ■ Discuss the result with the client, inviting them to look in the mirror. <p>PRODUCT: CARELIKA Oxyglow Hydration Spray (2ml)</p>
<p>STEP 7 RECOMMENDED HOME RITUAL</p>	<ul style="list-style-type: none"> ■ Provide the client with a list of home care products and explain how to use the prescribed products.
